KEY COMPETENCIES

React/Vue	Node	No-/SQL	Recommendation Systems
Agile	Lean Startup	Serverless Computing	
Artificial Intelligence		Agile Requirements Gathering	

RELEVANT EXPERIENCE FROM CONSULTING

Product Lead

[Husleie.no](#) 07/2019 - 02/2020 Oslo, Norway

Husleie.no is a Norwegian SaaS scale-up revolutionising the rental market in Norway, and soon Europe. Reported directly to CEO and CTO.

- Lead process improvement efforts across the organisation, focusing on the task pipeline into the development team.
- Lead agile requirements collection and specification for past, present and future products and services to create a knowledge base and facilitate engineering work for the next six months.
- Administered three critical business partnerships and participated in business development with CEO and Sales.
- Revamped Customer Success through Zendesk, self service and automation.
- Worked with digital analytics strategy and implementation.

Full-Stack Developer & Data Scientist

[VG / Schibsted Group / Netlight Consulting](#) 01/2019 - 07/2019

Oslo, Norway

VG is Norway's largest newspaper with over 2 million unique visitors each day.

- Delivered a partner integration API with one of Norway's largest telco-providers to bundle subscriptions services, resulting in several thousand new subscriptions.
- Modernised the portal for VG's premium content with a new look, archive features and a recommendation system.
- Worked with user consents systems in MySQL and NextJS to ensure GDPR compliance.

[vg.no](#)

Front-end Engineer

[Klarna Bank / Netlight Consulting](#) 09/2018 - 12/2018

Berlin, Germany

Klarna is a Swedish tech unicorn that provides payment solutions for 60 million shoppers across 100,000 retailers in 14 countries in Europe, and the US.

- Worked in the Merchant Onboarding Experience team, preparing Klarna for launching in the US with a tailored sign up experience.
- Our onboarding flow helped over 2000 merchants become Klarna customers during my stay.
- Thrived in a remote team based in Berlin.
- Quickly became the team retro champion, continually working to make the team more cohesive and productive.

PROJECTS

Swipestats.io

Upload your dating data anonymously and compare it to demographics from around the world.

- 10+ visualizations with chart.js
- Meta analytics and stats extrapolated from uploaded data
- Developed as a PWA with Nuxt.js(Vue), Heroku and MongoDB
- [Open sourced on GitHub](#)

[swipestats.io](#)

Distributed Co-Living

An AI recommendation system that matches users with their perfect roommates into shared apartments based on habits, context and interests.

- Built as a Single Page Application with React & Redux, a NoSQL database and Cloud Functions.
- The system clusters users into apartments by a hybrid approach of kMeans and k-nearest neighbours.

ACHIEVEMENTS

Entrepreneurial Mindset

I have worked at startups in Norway and Australia. The lessons I learned from those teams about grit, ingenuity, and hard work inspire me to this day

Been to 35 countries & counting

Seeing the world and the people in it is what motivates me to work with technology that connects people. I also blog about it at [kristianeboe.me](#)

EDUCATION

MSc in Computer Science & AI
[Norwegian University of Science and Technology\(NTNU\)](#)

2013 - 2018 Trondheim, Norway

- Specialisation: Artificial Intelligence & Recommendation Systems

Study Abroad / Exchange

[University of Melbourne](#)

2015 - 2016 Melbourne, Australia
